## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 1,2 and 7 are rejected under 35 U.S.C. 102(a) as being anticipated by Shiraishi et al (US 6,683,921).

Shiraishi et al (US 6,683,921) describes a prior art apparatus for receiving BS digital broadcast. Since its PCT application was published in June, 1999, the prior art described in this patent anticipates the present invention with the priority date of May 24, 2000.

The apparatus, shown in Fig.12, regenerates a carrier by a carrier regeneration loop (10) and establishes phase synchronization to decode a PSK modulation signal regenerated from a modulated signal to a digital signal, where the phase of a signal point indicated by the PSK modulation signal outputted from said carrier regeneration loop is shifted (13,14-1,15-1,15-4) by a phase determined on the basis of the type of PSK modulation technique (ar(3)) applied to a received signal and a phase error contained in the PSK modulation signal, then the digital signal is decoded, and the carrier is regenerated on the basis of a phase error detected by performing burst receiving only in a predetermined signal interval (see Fig.11A).

See cols. 1-12.
